ACEL Power's Pursuit of Innovation: Applying for 29 Patents in Electric Outboard Technology and Beyond
Introduction ACEL Power, a pioneer in the electric outboard motor industry, is making significant strides in advancing marine technology by applying for 29 patents in various domains. These patents encompass safety, autonomous systems, user experience, powertrain, ...

ACEL's electric outboard motors are designed to be safe and reliable, and overheating protection is an important part of the design. More stable lithium ion battery, 280° up for thermal overrun.

They're teaming up with ACEL POWER, Inc (ACEL), bringing the power of electric propulsion to their fleet. On June 20, 2023, the first batch of ACEL 75HP Electric Outboards have arrived and are ready to be paired with new pre-rig Godfrey Pontoon Boats. This collaboration marks a significant step towards more sustainable boating, demonstrating ...
