

What is Taiwan's energy supply in 2022?

Taiwan's energy supply reached 140 million KLOE in 2022. In which, crude oil and petroleum products accounted for 43.7%, while coal, natural gas, nuclear, and renewable energy accounted for 29.7%, 19.1%, 4.9%, and 2.6% respectively. Comparing to neighboring countries, our dependency on fossil oil was significantly higher.

What is Taiwan's energy development policy?

Facing the global climate change and GHGs emission, Taiwan's energy development must consider the objectives of energy, environmental, and economics. Thus, the government announced the "Guidelines on Energy Development" in 2012, and amended it in 2017. For details of policy information, please refer to EA website.

What is the current energy mix and current energy policy in Taiwan?

What is the existing energy mix and current Energy Policy in Taiwan? Taiwan's energy supply reached 140 million KLOE in 2022. In which, crude oil and petroleum products accounted for 43.7%, while coal, natural gas, nuclear, and renewable energy accounted for 29.7%, 19.1%, 4.9%, and 2.6% respectively.

Does Taiwan rely on imported energy?

Meanwhile, nuclear power, which has long been a reliable and relatively low-carbon energy source for Taiwan, provides 7 percent of the nation's electricity and pumped storage accounts for 1.2 percent. Taiwan's extreme reliance on imported energy sources poses significant risks.
