

Will the Philippines be able to boost renewable generation in South-East Asia?

Such complications mean the region's biggest polluters are likely to see emissions rise until well into the 2030s,said BloombergNEF,making room for the Philippines to spearhead renewable generation growth in South-east Asia. The country's success is far from assured,however.

How can the Philippines accelerate its energy transition?

To truly accelerate its energy transition,however,the Philippines will have to surmount an array of challenges including the need to extend transmission linesto distribute power across the archipelago of more than 7,000 islands. It will also need to expand its grid capacity,boost storage and streamline the land permitting process.

What are the challenges facing the energy sector in the Philippines?

The energy sector in the Philippines is confronted with a significant challenge arising from the escalating power demand owing to population growth, rapid economic expansion, and a strong emphasis on digitalization.

Is the Philippines a regional leader in clean-power projects?

Windmills in Burgos town,in Ilocos norte province on May 8,2024. PHOTO: AFP MANILA - The Philippines has leapfrogged its South-east Asian neighbours to become a regional leaderin planned clean-power projects as fewer investment restrictions and green-minded policies attract domestic and foreign cash.
