

What makes aentron a good battery company?

In addition, aentron uses standardised internal battery components, including battery management systems (BMS), cells, and more, to ensure that its solutions can go-to-market rapidly and cost-effectively. As a result, the company can develop its core solution rapidly before customising it to meet the energy requirements of a specific application.

Where are aentron batteries made?

The aentron GmbH, based in Gilching near Munich, is a provider of high-quality lithium-ion batteries for industrial applications. The particularly robust energy storage solutions are developed and produced in Germany and are characterized by high resilience, scalability, modularity and security.

Why is aentron a success story?

With such unparalleled capabilities, aentron has ignited several client success stories since its inception in 2015. In one instance, the company assisted a manufacturing firm in overcoming their challenges in powering autonomous robots for their production line.

An electricity supply operating independently from public grid connections is called an OFF-Grid solar electricity system or Island System. Possible applications for this system range from power supply for mobile homes, holiday homes, mountain huts as well as medical facilities to even rural villages. aentron provides Systems that can work both - OFF- and ON-Grid.
