

What does AGSI+ stand for?

The GSE Transparency Platform (AGSI+) of Gas Storage Europe (GSE) has been extended to include storage data for Naftogaz of Ukraine. AGSI+ is the name of the platform. With this addition, AGSI+ expands its coverage beyond EU 28 for the first time.

What is AGSI & AlsI?

As a voluntary initiative by storage and LNG operators, it can be considered as a benchmark to monitor pan-European filling levels for storage and send-out by LNG terminals. 100% of the market of underground gas storage in the EU27 is covered on AGSI and 100% of EU27 large-scale LNG terminals are listed on ALSI.

What is Gie AGSI & TP?

The Agency for the Cooperation of Energy Regulators (ACER) published an in-depth report on the Gas Storage Regulation, and GIE AGSI +TP was one of their main sources of information for providing key storage indicators per country.

Dr Axel Wietfeld, President of Gas Storage Europe (GSE), the European association of the Storage Operators and hence one column of Gas Infrastructure Europe (GIE), stated: "Underground gas storage facilities have played a pivotal role in ensuring EU security of supply during the cold spell. If we take the example of Germany, in the last few weeks, 61% of gas ...

Following Russia's invasion of Ukraine in early 2022 and resulting international sanctions, natural gas imports from Russia to Europe declined drastically to well below their historical averages (Figure 1). ... We estimate storage capacity using AGSI/GIE data on working gas volumes, converted to billion cubic meters.

Note to editors. Gas Storage Europe (GSE) represents the interests of 32 Storage System Operators with around 100 storage sites in 16 countries in Europe, representing approximately 79 BCM, i.e. 88% of EU technical storage capacity. GSE is one column of GIE, Gas Infrastructure Europe, the European association of the Transmission, Storage and LNG terminal Operators.

Gas Infrastructure Europe (GIE) is the association representing the interests of European gas infrastructure operators. GIE members are active in transmission, storage and regasification ...

Gas Infrastructure Europe (GIE) is the association representing the interests of European gas infrastructure operators active in gas transmission, gas storage and Liquefied Natural Gas (LNG) regasification. GIE is a trusted partner of European institutions, regulatory bodies and industry stakeholders.

March 7, 2022 Download this Press Release (PDF, 141KB). Brussels, 7 March 2022 . AGSI+ welcomes 2 new German Storage System Operators (SSOs): Gas Infrastructure Europe (GIE) is pleased to welcome EDF Gas

Deutschland GmbH and EnBW Etzel Speicher GmbH as data providers on its AGSI+ Transparency Platform. The two companies jointly operate a storage ...

More than 80% of the storage facilities are located in the western part of Ukraine close to the border with the EU Member States. However, due to the war and associated political and ...

Secretary General, GIE. Boyana Achevski is the Secretary-General of Gas Infrastructure Europe (GIE), a role she has held since September 2016. GIE is the European association of gas transmission, gas storage, and LNG regasification terminal operators.

A mention of GIE, AGSI or ALSI (as applicable) as data source is a minimum requirement. Example : indicate GIE (Gas Infrastructure Europe) or GIE AGSI / ALSI platform as data source underneath the data or insert ... Only the daily storage and LNG inventory reporting on the platforms is made available through the API service. Unavailability ...

ENTSO-G has created a dashboard to support stakeholders and policy makers to better understand and use data in relation to European gas flows, LNG, and storages. The information presented in the dashboard is sourced from ...

storage facilities have been temporarily suspended as of 03/03/2022. An aggregated dataset covering all Ukrainian storages is expected to return on AGSI+ traffic on the GIE Transparency Platforms has increased 265%. Learn more on [gie](#) . [GIE Maps](#). AGSI+ - UGS Transparency Platform

In 2020, Ukraine harmonized its regulatory framework with that of the EU and substantially reduced the cost of warehousing gas in Ukrainian storage for EU-based traders by cutting transport tariffs and exempting temporarily stored gas from customs duties. Thanks to these reforms, European customers were able to use Ukrainian storage sites during the 2020 ...

NJSC "Naftogaz of Ukraine" (Naftogaz) has joined the Transparency Platform (AGSI+) by the standards of the European Storage System Operators (GSE). Starting this week, for Ukraine storage facilities representing a working gas volume of 32 BCM will be reported disaggregated on a weekly basis.. The data will be published every Friday and will display ...

A (more or less) simple script that reads data from the AGSI/GIE (Aggregated Gas Storage Inventory) API and stores it in an InfluxDB for later use with Grafana or similar. The AGSI/GIE website provides gas filling levels for various countries in Europe. - [LordOfTheSnow/agasi](#)
