

How is energy used in Algeria?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How much solar energy does Algeria generate?

Instead, today Algeria generates only 411 megawatts from renewable energy sources. Nonetheless, officials hope that the new strategy described will reinvigorate attempts to bring more than 1 gigawatt of solar energy online by year-end and an additional 13 gigawatts by 2030.

How many hydropower plants are there in Algeria?

Algeria has 13 hydropower plants, mainly located in the northern parts of the country where rainfall is relatively plentiful. Although the share of renewable energy in the generation mix remains limited, it is growing.

How much natural gas did Algeria export in 2021?

According to BP's 2022 Statistical Review of World Energy, Algeria exported about 1.9 Tcf of natural gas in 2021, most of which went to Europe. About 567 billion cubic feet (Bcf) of natural gas was exported as LNG, and the remaining 1.4 Tcf was shipped via pipeline (Figure 10 and Figure 11).²⁰

Does Algeria use fossil fuels to generate electricity?

Algeria's electric power sector primarily uses fossil fuel-derived sources for generation, comprising about 97% of total power capacity in Algeria (Figures 4 and 5). Algeria's total electricity capacity nearly doubled between 2011 and 2020.

What is Algeria's Energy Transition Plan?

Algeria's energy transition plan consists of three structural components - a new government ministry, a regulatory reform, and a new national renewable energy company. o Ministry of Energy Transition and Renewable Energies (METRE): In June 2020, the government created METRE, the first of two new bodies to manage and carry out the transition plan.
