Equatorial Guinea: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Ensures that the state-of-art technology is applied throughout the engineering phase for cost effective solutions and application of value added engineering throughout the assigned works. Participates in the pre-qualification of engineering consultants/vendors and review the bidders list.

o Identify customers' needs, clarify information, research every issue and provide solutions and/or alternatives. o Follow communication "scripts" when handling different topics. o Seize opportunities to upsell products when they arise. o Keep records of all conversations in our call center database in a comprehensible way.
