A few weeks ago, a Tesla Megapack caught fire at a PG& E utility electrical substation in California. There were no injuries and damages appeared to be limited to one Megapack out of 256. It is another notable example of a Tesla battery in thermal runaway, after there have been many in recent years. However, is this an issue with Tesla batteries?

The Tesla Megapack and Megapack2 are not car batteries; they are mass storage batteries. My understanding is their use is mainly grid back up and reliability. Having said that, Tesla uses numerous sources for car batteries. This is nothing new. Tesla started using the LFP batteries in the American market Model 3 Std Range deliveries in 2021 I ...
