

# American Samoa solar panel for camper

Will Tesla Solar power Ta'u in American Samoa?

Tesla has announced their solar panels are nearly entirely powering the island of Ta'u in American Samoa. The island used to depend entirely on imported diesel fuel for its electricity, but a new initiative has seen the islanders build a 1.4-megawatt microgrid that absorbs and stores solar power for all their energy needs.

Does American Samoa have a solar microgrid?

The island of Ta'u in American Samoa now boasts a solar microgrid from Tesla's SolarCity. Join us in The People v. Climate Change and share an environmental portrait of someone taking positive steps to protect the Earth on YourShot or social media. Use #MyClimateAction to share a first-person perspective on how we as humans face climate change.

How many people live in Samoa?

(The island's population varies with the season but usually falls between 200 and 600 people.) The solar project was installed by SolarCity, a California-based company recently purchased by Elon Musk's Tesla. The \$8 million project was funded by the U.S. Department of Interior and the American Samoa Power Authority (ASPA).

How many solar panels does Ta'u have?

Located on seven acres of land on the northern coast of the island, the system includes 5,328 solar panels, generating 1.410 megawatts of electricity. The energy can be stored in 60 Tesla Powerpacks --large batteries that allow Ta'u to stay powered for up to three days without any sunlight.

What is a church choir in American Samoa?

Ta'u, American Samoa -- On a recent Wednesday evening on the island of Ta'u--one of the outer islands in American Samoa--most of the people in all three villages are at pese--or church choir--practice. The annual island-wide youth group showcases are coming up and each choir senses the pressure of having to perfect their routines.
