About Ampersand. Ampersand is Africa's first and leading integrated electric motorcycle and transport energy solution. Headquartered in Kigali, Rwanda, Ampersand builds battery packs and affordable electric motorcycles that perform better than East Africa's five million petrol taxi motorbikes while costing less to buy and operate.

Ampersand is Africa's first electric transport energy company headquartered in Kigali, Rwanda, with a presence in Nairobi, Kenya. We're achieving the world's first true mass-market shift to electric vehicles, a vital tipping point in the fight ...

Ampersand's e-motos cost less than petrol ones to lease or buy and half as much to power. They produce 75% less lifecycle greenhouse emissions than petrol motorbikes using grid power and up to 97% less using renewables. Our ...

The Charging Station Attendant (CSA) is stationed at the charging station level and plays a pivotal role in delivering seamless customer service to Ampersand's customers, particularly moto ...

Ampersand has developed a battery pack, battery-swap network and software back end to replace fuel for the world's largest motorcycle market segment: 100-150 cc motorbikes in the Global South. Motorbikes powered by Ampersand cost less to buy, fuel and operate than petrol motorbikes, without sacrificing performance, convenience and reliability.

But cleaner, more cost-effective change is arriving. The electric vehicle revolution is gaining momentum in Rwanda, where Africa's first e-motos made by start-up Ampersand can help to reduce emissions - producing 75% less lifecycle greenhouse emissions than petrol motorbikes using grid power, and over 98% less on renewables.

Ampersand, a pioneering electric vehicle (EV) startup based in Rwanda, has achieved a significant milestone by producing and deploying 1000 electric vehicles. This achievement marks a momentous step in the country's ...

The income they generate typically supports 4.6 people on average in Rwanda and 3.8 people in Kenya. Ampersand's solution is designed with taxi drivers in mind. Our guiding philosophy is to offer drivers a motorcycle and energy that costs less to acquire and operate, outperforms their current setup in every way, and happens to be electric.
