How much do solar panels cost?

Finding the lowest possible price tag for your solar panel installation might sound like the best way to save money when you go solar, but the payback period of your solar panel system might take twice as long, and your panels may never earn the return you expected. In 2024, the average cost of solar panels is around \$2.86/W before incentives.

What are the best Cheap solar panels?

Based on our latest Intel Report, we've compiled a list of the best cheap solar panels that are as reputable as they are affordable. AXITEC, Jinko Solar, LONGi Solar, REC Group, and QCELLS are our top picks for the best cheap solar panels based on their price per watt (\$/W) and performance.

Are LONGi Solar panels a good choice?

If you're trying to go solar on a budget but aren't willing to sacrifice efficiency, LONGi solar panels are a great solution. REC Group solar panels are the most frequently quoted brand on EnergySage and, based on our latest Intel Report, the least expensive (when paired with the Solar Edge inverter) of our top brands.

How much do solar panels cost in 2024?

In 2024, the average cost of solar panels is around \$2.86/W before incentives. Between falling prices, incentives and rebates, and flexible financing options, you likely won't need to pay serious cash out of pocket to get the best solar panel deal.

How much does Anglec spend on electricity?

According to Mr Hodge, ANGLEC is currently spending between \$40-\$93 million a year in diesel cost to supply electricity to the island. "Two years at that level of expenditure, we can put in a wind and solar plant that have a life of at least 25 years," Mr Hodge stated.

Are solar panels affordable?

Solar panel affordability continues to increase thanks to falling prices, incentives, rebates, and flexible financing options. The solar panel with the cheapest price tag may not be the most cost-effective option in the long term. Consider efficiency, performance, and warranties when comparing your options.
