"The Department of Defense (DOD) exercised contract options for two teams-- led by BWXT Advanced Technologies, LLC, Lynchburg, Virginia; and X-energy, LLC, Greenbelt, Maryland--to proceed with development of a final design for a transportable advanced nuclear microreactor prototype. The two teams were selected from a preliminary design ...

TRISO-X fuel utilizes high assay low enriched uranium (HALEU), which allows for longer periods of reactor operation compared to conventional fuel. We expect this to contribute to increased energy output and reduced fuel costs. X-energy's proprietary TRISO manufacturing process also contributes to cost reduction.

ROCKVILLE, Maryland, July 21, 2022 - X-energy today announced a significant step toward the creation of a unique energy delivery model with the selection of Zachry Group and the combined team of Burns & McDonnell and Day & Zimmermann as constructors to collaborate and work with the company on the next phases of design and deployment of its Xe-100 advanced reactor fleet.

X-energy is delivering the next generation of carbon-free energy by reinventing nuclear power. X-energy manufactures fuel that seals uranium particles in a protective coating, which makes meltdown impossible and retains the waste inside forever. We also design plants that unlock the fuel's potential in a process that's as clean as wind or ...
