ANTIGUA BARBUDA 3 Antigua and Barbuda is a small island state with no known indigenous fossil resources for energy supply; the country imports 100% of petroleum products to meet its energy demands. This dependence on fossil fuels exposes our nation to external shocks and the volatility of the petroleum fuel market. Rising energy

Antigua and Barbuda generates 93% of its electricity from diesel-fueled generators and has set targets of becoming a net-zero nation by 2040 and having 86% renewable energy generation in the ...
