OverviewFuture plans and investmentsInstalled capacity for electricity generationNuclear powerFossil gas
powerElectricity consumptionElectricity transmission and distributionFinancial aspectsThere are numerous
investment opportunities in the sector as Armenia has significant potential for electricity production from
renewable energy sources such as hydropower, wind, solar, geothermal, and biogas. Armenia also has a large
solar energy potential. Compared with other countries, the average annual energy flow is higher; therefore,
there is large interest in this energy sector.

Armenia power station 3000wh

Installed capacity is approximately 389 MW for annual generation of 943 GWh, covering 14% of domestic supply. Several small plants also produce wind power (4.23 MW), bioenergy (0.835 MW) and solar power (56 MW), with limited ...

The tariffs are specified on an annual basis to account for exchange rate fluctuations between the Armenian dram and a foreign currency (USD or EUR). Feed-in tariffs were introduced in 2007, and by January 2022, 389 MW of ...
