Living sustainably in a condo is now more appealing than ever. Many people are thinking about installing solar panels in their condos. While moving to solar energy brings environmental perks and cuts costs, it's not without its hurdles. Limited space and shared ownership complicate things. This guide will show condo owners how to successfully switch [...]

In a unit-owner project, one or more unit owners pay to install a solar panel system on the condominium's roof for their personal use. If you propose a unit-owner project, you will need to get approval from the condo association and obtain an easement to authorize system installation and maintenance. Sometimes, the association may also charge ...

Longer Payback Period. With net metering unavailable, you will naturally miss out on most of the benefits of solar.. This results in a longer payback period (~10-20 years), compared to 5 to 7 years for most landed homeowners. In simpler terms, it takes much longer to recoup your initial solar panel investment and start seeing savings on your electricity bill, as ...
