Who is Aspen Energy?

Aspen Energy is a national energy consulting firm headquartered in Dublin, Ohio that provides energy procurement and management services for customers. Aspen Energy serves a broad base of small business, commercial and industrial customers located across the United States in deregulated energy markets.

Does Benin have a good energy sector?

This paper analyzed the energy sector in the Republic of Benin, a developing country in West Africa that has many problems in meeting the needs of its population for almost all sectors over the last decade, specifically, between 2010 and 2018, in terms of production, consumption, and imports.

Which institutions are working to provide access to affordable energy in Benin?

Several institutional frameworks in the energy sector in Benin are working to provide access to affordable energy in the country. The ME is the biggest institution of the energy sector, responsible for the management of the energy sector and in charge of the implementation of RE projects.

Does Benin have a green energy potential?

Benin has also joined this dynamic by considerably increasing its green energy production efforts in recent years. The country has a huge undeveloped renewable-energy (RE) potential that can contribute considerably to its national energy production capacity. This paper summarizes the current RE situation in Benin and examines its future prospects.

What is the energy sector strategy in Benin?

In Benin, the energy sector strategy is aimed at improving the energy independence of the country and diversifying its sources of supply through the implementation of various interconnection projects with neighbouring countries and the enhancement of the national RE potential.

Does Benin have electricity?

Electricity consumption in the Republic of Benin is highly dependent on external supplies, with 90% of the country's electricity coming from Ghana (Okanla, 2014, as cited by Kwakwa, 2018). Benin is subject to power cuts and recurrent energy crises, according to Atchike et al. (2020).

Aspen Energy will help you decide on whether to secure an agreement tied to the Day Ahead or Real Time Index LMP and which components should be included or passed through based on your ability to manage and shift load. The benefits of using an index price agreement includes little to no premiums for load shaping, load following or forward risk ...

Accordingly, Aspen Technology or Gulf Energy Information may use your personal data to contact you regarding your interest in this webinar, send you related content, administer research surveys, accurately deliver contracted services, register you for events, understand your preferences and detect and prevent any fraudulent or unauthorized ...

In recent decades, energy and chemical companies have benefited from digital technologies to increase the efficiency of hydrogen (H2) processes while ensuring safe and economical production, storage and transportation. Today, digitalization is increasingly crucial as hydrogen systems grow in complexity, utilizing green power sources and getting deployed at a larger scale.

over \$1M USD/year

Reducing energy use and GHG emissions remains a priority for the process industries. However, when designing more energy efficient plants or revamping existing sites, a high level of expertise is required to perform Pinch analysis. Engineers have limited time available for design, and the use of separate tools by multiple disciplines also brings the risk of errors due to manual data ...

Learn how a leading integrated energy company migrated to Aspen Unified PIMS in less than three months, quickly trained 25 users and provided planners with an easier, faster way to share information--all on one Unified server. Powerful features such as a streamlined interface and easy integration with other systems enabled the company to:

- o Make better business decisions ...
