After earning a green electricity score of 6 out of 10 stars in 2019-20, Energy Australia dropped to 1.5 stars our 2020-21 survey. Although it invested heavily in renewables in 2017, it has the least ambitious decarbonisation goals of Australia's "big 3" energy providers. It mines coal as well as burning it, and plans to burn coal until 2040.

This strategic collaboration will strengthen the nation's energy security, contribute to renewable energy goals, and position Australia as a global leader in solar technology. SunDrive and Trinasolar are committed to getting Australian-made solar panels on the roofs of Australian homes and businesses, contributing to the country's goal of ...

REAP Grants can cover up to 50 percent of the total eligible project costs for renewable energy and energy efficiency projects. The minimum project cost for renewable energy systems is \$10,000, while the maximum grant size is \$1,000,000. For energy efficiency improvements, the minimum project cost is \$6,000, and the maximum grant size is \$500,000.

All forms of renewable energy have pros that outweigh the cons, including nuclear. And nuclear is by far the most energy dense vs. the waste it creates. Maybe someday we'll figure out how to make a practical net positive energy ...
