

How many smart grid R&D projects are there?

This study is the 2013-2014 update of the inventory started out in 2011. The JRC's 2013-14 Smart Grid database contains 459 smart grid R&D and D&D projects from all 28 European Union countries. Switzerland and Norway were studied together with the EU28 countries since they are present in a substantial number of projects with EU countries.

Why are smart grid projects important?

Smart grid projects are playing a key role in shedding light on how to move forward in this challenging transition. In 2011, therefore, the JRC launched the first comprehensive inventory of smart grid projects in Europe to collect lessons learned and assess current developments.

How does a smart power grid work?

The buildings analysed simultaneously produce and consume energy and are integrated into a smart power grid. In the residential building, for example, air from the underground car park is recycled to provide underfloor heating in the 213 dwelling units.

Are physical grid assets a key enabler of a smart grid transition?

The analysis this year focuses on grid infrastructure, since the physical grid assets are increasingly being recognized as fundamental enablers of the smart grid transition and a potential source of criticalities for an effective and timely decarbonization of the energy system.

Why did the JRC launch a comprehensive inventory of Smart Grid projects?

In 2011, therefore, the JRC launched the first comprehensive inventory of smart grid projects in Europe to collect lessons learned and assess current developments. The participation of project coordinators and the reception of the report by the smart grid community were extremely positive.

In a close cooperation between researchers and industry, new technologies for tomorrow's electricity grids have been developed and put to the test since 2009 in Austria's first Smart Grid showcase region. In the pioneer project HiT (buildings as interactive participants in a Smart Grid), all relevant Smart Grid low-voltage elements are linked ...

In Austria, there is targeted research on Smart Grids since 2003. [3] Since 2008 the National Technology Platform Smart Grids Austria (SGA) was formed by Stakeholders of the national energy sector (Innovative Grid Operators, Researchers, Industry, Suppliers, Consumers). The SGA since then came up

PROJECT STRUCTURE The building up of the National Technology Platform Smart Grids Austria is divided into a definition and implementation phase (see Figure 1). ... NTP Smart Grid Austria Definition Phase Implementation Phase. Title: Microsoft Word - SmartGrids2008_0092_paper.doc

The Slovenia-headquartered company was recently in the news for a 20MWh project it commissioned in Austria, which is the country's largest, ... (Energy Smart Grid Platform), which manages the various assets in its electricity network and is the core of the business.

In this project, CSIRO's primary action is to share knowledge by explaining the evolution of the smart grid in Australia to global counterparts, and learn about what is happening in their countries. In particular, CSIRO has written the Australian chapter in two Smart Grids Innovation Challenge Country Reports (2017, 2019).

The successful submission of the pilot project Smart District Gniel in the second Call Smart Energy Demo - fit4set, involving several project partners, can be viewed as the success of the project. The practicality of the proposed measures and the broader interests of the stakeholders of the city have been proven.

This page hosts analyses and insights from the JRC rolling reviews of smart grid projects, performed in cooperation with policy, regulatory, industrial and research partners since 2011. Some previous editions were accompanied with ...

[bc_video account_id="1214147015? player_id="HypJxq3ml" video_id="4257845359001? min_width="480px"] Salzburg AG, energy supplier for 260,000 customers in the province of Salzburg, Austria, has expanded its smart grid contract with Itron.. In the second phase of its smart grid pilot project, Salzburg AG will upgrade its OpenWay smart ...

Project Coordinator and WP - Coordinators NTP - Members (All direct participating members) NTP - Board One branch representative from: Industry (technology) Electricity (grid/supply) R& D institutions ... Roadmap - Smart Grid Austria. RD & D aspects. Market aspects. Definition. and .

The Power Potential project in England is developing the world's first grid-scale smart network. The company in charge, UK Power Networks, claims it could save energy consumers in the region of £400m by 2050, and generate an additional 4GW of capacity to the country's energy mix. What is the project hoping to achieve?

In close cooperation between researchers and industry, new technologies for tomorrow's electricity grids have been developed and put to the test since 2009 in Austria's first Smart Grid showcase region. In the pioneer project HiT (buildings as interactive participants in a Smart Grid) all relevant Smart Grid low-voltage elements are linked ...

The main goal of this study is to collect a wide inventory of Smart Grid projects in Europe and use project data to support analysis on trends and developments. The report looks into several aspects of the Smart Grids landscape to ...

Developer NGEN Smart Grid Systems has completed a 10.3MW/20.6MWh standalone battery storage project

in Austria, the largest in the country, it claimed. The Slovenia-headquartered firm has installed the project ...

Technologieplattform Smart Grids Austria, Dr. Angela Berger (Geschäftsführerin) Mit Beiträgen von: ... Zielsetzung der Smart-Grid-Technologieroadmap Die vorliegende Technologieroadmap ist ein zentraler Beitrag zum - vom bmvit initiierten - Strategieprozess Smart Grids 2.0. Sie behandelt die kurz- und mittelfris-

The battery energy storage system (BESS) is made up of Tesla Megapacks, the EV giant's grid-scale lithium iron phosphate-based (LFP) product, and a total of EUR15 million (US\$16.2 million) was invested into the project. ...

Second, SENSE is guided by two use cases in the smart grid and smart building domains from Austria's largest smart city living lab. Technology advances will be applied to these use cases through several in vitro (simulation-based) and in vivo (living lab-based) proofs-of-concept (PoCs) with high domain-specific novelty and exploitation potential.

Today more than half the world's population and two-thirds of Europeans are living in cities or urban areas; the figure for Austria is 64%. The global trend in urbanization is upwards; the process will continue in the future, and the city will become the dominant environment in social and economic t

In Europe, Austria's Salzburg AG, a local multi-utility company for the city and state of Salzburg, has chosen Itron to expand upon its smart grid pilot project. Itron will supply its Riva edge intelligence technology to enable adaptive communications technology and computing abilities for the utility's meters and other electric grid ...

Smart Grid projects in Europe: Lessons learned and current developments 2013 Vincenzo Giordano, Alexis Meletioui, ... project information on the web and through cooperation links with European research ... i.e. Austria, Belgium, Denmark, ...

Utilisation of synergies is a key approach the transition of today's energy systems into future Smart Grids. Climate and energy targets both on European (e.g. EC Climate and Energy Package) and national level (Austrian Energy Strategy) can only be realized, by using all available resources and options. Smart Grids will play an important role here, especially regarding the ...

GreenSwitch is a cross-border electricity smart grid project between Austria, Croatia and Slovenia. CEF's support of EUR73.1 million for investments will serve to upgrade electricity grids to allow for the integration of ...

In this case, it is considered that for a smart grid project, the allocated budget was mostly spent in the project's starting year. ... Spain, Italy, Netherlands, Austria and Ireland transitioned in 2009-2010 followed by United Kingdom, Belgium, Czech Republic, France, Sweden and Slovenia in 2011-2012. As noted before (leaving

aside the ...

International collaboration to disseminate Smart Grids. The International Smart Grid Action Network (ISGAN, set up in 2010) is a multilateral network aimed at promoting the development and use of Smart Grids. 25 IEA member states ...

LIBERTY LAKE, Wash.--May 20, 2015--Itron, Inc. (NASDAQ: ITRI), a world-leading technology and services company, announced today that Salzburg AG, energy supplier for 260,000 customers in the province of Salzburg, Austria, has expanded its smart grid contract with Itron.

The main goal of this study is to collect a wide inventory of Smart Grid projects in Europe and use project data to support analysis on trends and developments. The report looks into several aspects of the Smart Grids landscape to describe the state of the art of their implementation, the emerging hallmarks of the new electricity system and the ...

About the ERIGrid project Thomas I. Strasser Coordinator ERIGrid ... for validating smart grid systems
