# **Beigood wind turbine Kiribati**

A wind turbine on top of an RV or a Tiny House rolling down the highway will definitely spin, but it is unlikely that the amount of energy you generate would be as much as the added gas you use because of the increased drag, so the smart money would be on a net loss of energy. It amounts to using one source of energy to generate another, like ...

The highlight goes to the 5000W version, designed to operate in voltages of 12V, 24V and 48V, depending on energy demand. The equipment is equipped with up to five blades that optimize wind capture, as well as a patented permanent magnet generator, which guarantees high performance and longevity.
