How much does solar cost?

The true cost of solar ultimately varies depending on the installer and their soft costs, how they price equipment and any financing costs. Sales and marketing (customer acquisition) are one of the largest expenses incurred by most solar companies and can account for up to 18% of the final price of a solar panel system.

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

How do I get a cost estimate for a solar panel system?

You can get a cost estimate for a solar panel system from multiple installers. Your solar estimate will show a total dollar cost for the total system size and capacity, typically measured in kilowatts.

Are solar batteries worth it?

Solar batteries are expensive, but financial incentives are available to lower the cost. Prices often depend on the battery's storage capacity, expected life span, brand and other factors. Homeowners often find that solar batteries are worth it for energy security-- even if they're not worth it financially.

Should you install a solar battery when installing solar panels?

By installing a solar battery when you install your solar panels, you may be able to save by bundling the entire project through one installer rather than piecing together equipment from separate companies.

How do I choose a solar battery?

When comparing solar battery options, remember to consider what's included in any given price before signing a contract. For example, you may have to buy an inverter or charge controller separately to get your battery operational. Lead-acid batteries are often significantly cheaper than their lithium-ion counterparts.
