

Why should you install solar panels in Belgium?

With enough solar panels, you will be significantly less dependent on your energy provider and are able to use completely green electricity. Solar panels can also help you with lowering your energy bills. There are two different types of solar panels in Belgium you can install: What Are Solar Thermal Panels?

Where can I install solar panels in Belgium?

For the installation of solar panels on the ground, on a protected building or in other regulated cases, you will have to contact your municipality. There are several companies active in Belgium that install solar panels.

How much do solar panels cost?

The price of solar panels has dropped significantly in recent years. In addition, you can receive a subsidy from the government for photovoltaic panels. The average solar panel price is around EUR1.26 per watt peak (Wp), although the exact price depends on a number of criteria:

How much energy is self-consumption in Belgium?

On average for a household in Belgium, it is estimated that between 30% and 40% of the energy produced is self-consumed. This means you'll buy less electricity from the grid, generating savings on your annual electricity bill. For a company, the rate of self-consumption depends very much on the company's profile.

The table below gives you an overview of the average price for a solar panel system, based on your energy consumption or the number of people in your household. The prices shown include the solar panels, inverter and installation.

A new study by the Belgian energy regulator CREG warns of an abundance of solar power and that more flexibility will be needed to accommodate the growing surpluses. The high-voltage grid operator Elia had already sounded the alarm before the summer. Since 2021, Belgium's solar panel capacity has more than doubled to 10.3 gigawatts.

Talking about Scandinavia, it's also a place where they have over production of electricity and even when being forced to export to other EU countries the prices are 1/5-1/2 vs Belgium. Additionally to that, if you have solar panels and sell it back to the grid you get the same as the market value - meaning it's a fair market price no matter if ...

Belgian solar panel installers - showing companies in Belgium that undertake solar panel installation, including rooftop and standalone solar systems. 649 installers based in Belgium are listed below. Solar System Installers. Belgium. Company Name Area Filter by: Antwerpen (102) ...
