

Step two: Ben-Gurion University will issue an invoice, including all pertinent banking information and send it to the person nominated as "contact person". Step three: Payment by your institution - by bank transfer or check. Please send a copy of the bank transfer to the same email address. Step four: Ben-Gurion University will issue a receipt.

DLD08 A series of solar energy power stations in the Negev could supply all of Israel's power needs - or, if you wanted to be really ambitious, you could supply all of the world's electricity needs with the aid of slightly under 10 per cent of the Sahara. So says Professor David Faïman of Israel's Ben-Gurion University, man with a plan and current proprietor of the largest ...

We are pleased to announce that planning is underway for the 24th Sede Boqer Symposium on Solar Electricity Production, organized by the Ben-Gurion National Solar Energy Center at the Jacob Blaustein Institutes for Desert Research, on Ben-Gurion University's Sede Boqer campus. The symposium will focus on a range of fascinating topics, including novel ...

Optimization of a solar water heating system for a Negev kibbutz, D.Faïman, J.M.Gordon and D.Govaer, Israel Journal of Technology vol 17 (1979) 19. Measurement of air flow rates in a dusty environment, D.Faïman and D.Govaer, Solar Energy vol 22 (1978) 399. Storage rings for thermal energy, D.Faïman, Solar Energy vol 19 (1977) 743.

The Ben-Gurion National Solar Energy Center seeks talented researchers to join our team as faculty members in the field of solar and renewable energy in its broadest sense, including (but not limited to) harvesting solar energy in different ways, efficient storage of harvested energy, Solar optics, integrating solar energy technologies with ...

At the Ben-Gurion National Solar Energy Center, scientists are experts in concentrated photovoltaics (CPV) that focus light--up to 15,000 suns -- into small, highly efficient photovoltaic (PV) modules. At the Ilse Katz Institute for Nanoscale Science and Technology, researchers are exploring new PV materials.

National solar energy center, Ben-Gurion University of Negev, &#183; I am an expert in wet chemical synthesis of nanoparticles, graphene materials, and piezoelectric-based Advanced nanomaterials and Device fabrication including perovskite solar cells. Currently, my research is focused on the photostability studies of triple-cation perovskite solar cells. I have experience in optimizing the ...

The Ben-Gurion National Solar Energy Center at Midreshet Ben-Gurion is the national alternative energy research institute of Israel. It was established in 1987 by the Ministry of National Infrastructures to study promising alternative and clean energy technologies, particularly those involving solar power. Since July 1991, the center has been operated by Ben-Gurion University of the Negev's Jacob Blaustein Institutes for Desert Research

LOCATION NOTE: The name of the town is Midreshet Ben-Gurion, or "the Midrashah&quot;, this is the name on the map, on Waze and where to get off the bus if coming by public transportation. The symposium is inside the Midrashah, part of Ben-Gurion University's so-call "Sede Boqer Campus&quot;. However, it is not part of Kibbutz Sede Boqer.. We will be operating a shuttle between the city ...

The Ben-Gurion National Solar Energy Center (BGNSEC) In addition to investment in the two private-enterprise projects referred to above, the government of Israel established, in 1985, a national solar technologies test center at Sde Boker in the Negev desert.

Adi Vital Kaplun "I was an exceptional student, and in her honor, we have chosen to name our Best Poster Awards after her. Adi earned her M.Sc. in Environmental Physics and Solar Energy from the Albert Katz International School at the Jacob Blaustein Institutes for Desert Research, Ben-Gurion University of the Negev's Sede Boqer campus, graduating with outstanding honors.

The Solar Energy Center at BGU is committed to addressing the challenges of solar energy in its broadest sense, including (but not limited to) harvesting solar energy in different ways, efficient ...

Faiman's theoretical physics research focused on hadron spectroscopy using the quark model and various associated symmetries. His solar energy research spanned studies of solar radiation, energy conversion devices, and power-producing systems. His most celebrated work was the development, in collaboration with the Zenith Solar Company, of a 10 m<sup>2</sup> mirrored, sun ...
