Both mono and poly solar panels perform very well on their own. However, mono solar panels will perform better because they only use a single crystal cell, increasing their spectral response and energy production. Mono solar panels have a better efficiency response at 16% to 24%, while poly solar panels are at 16% and 20%.

Shop online for the best monocrystalline & polycrystalline PV solar panels in Kenya. Reputable brands such as Jinko, JA Solar, Canadian Solar ... Monocrystalline Solar Panels. Mono-crystalline, as the name suggests, are PV panels with cells made up of a single (mono) crystal of Silicone. On the other hand, if we use multiple crystals in a single cell, then it is called a multi-crystalline or polycrystalline panel.. Silicon wafers are used in the process of manufacturing mono-crystalline cells.
