At the high end, the cost of a 40,000-watt DIY solar panel kit ranges in cost from \$63,400 to \$80,000. A more typical 8,000-watt DIY solar panel kit with 20 solar panels costs from \$15,000 to \$19,000.

1. 5kW Solar System Kit for Small Homes. The 5kW solar system kit is perfect for small to mid-sized homes in Europe. This kit is among the best whole home solar system kits for households with moderate energy needs. It includes: 16-20 solar panels depending on efficiency.; Inverter to convert DC to AC power.; Mounting hardware and optional Battery ...

The best solar panels offer the strongest combination of the two, the same way the best cars on the road today deliver excellent fuel efficiency while still going zero to 60 in under five seconds.

The higher, the better. But the higher, the more expensive. You can buy rigid panels, but for our car living purposes a kit that folds up into a briefcase is probably the best. Ecoflow and Bluetti has nice high-watt briefcase kits. But again, those are like \$4-500 kits. That said, personally, I opted not to go the solar route.
