

Bhutan redway power

How much power does Bhutan have?

Bhutan's installed power generation capacity is approximately 1.6 gigawatts (GW). Over 99 percent of the country's installed capacity comes from hydropower plants, accounting for 1,614 megawatts (MW) of the country's total capacity of 1,623 MW in 2018. More than 99.97 percent of households have access to electricity.

How much hydropower does Bhutan have?

Bhutan's installed hydropower capacity stands at 1,615 megawatts as of 2016, out of an estimated hydropower potential of 30,000 megawatts (23,760 megawatts of which is considered technologically and economically feasible). Hydropower generation drops significantly in the winter due to mountain streams freezing over.

What was Bhutan's first mega power project?

The Chukha Hydropower Project, or Chukha Hydel, was Bhutan's first mega power project. Construction started in the 1970s with commissioning in 1986 and the government assuming full control in 1991.

Why is energy important in Bhutan?

Energy in Bhutan has been a primary focus of development in the kingdom under its Five-Year Plans. In cooperation with India, Bhutan has undertaken several hydroelectric projects whose output is traded between the countries.
