

What are the energy practices of the UN in Somalia?

While the specific institutional arrangements are unique to Somalia, the energy practices of the UN are similar to those in other international peace operations in fragile contexts; they are overwhelmingly dependent on diesel generators for power, and represent sizable energy footprints in the areas where they are deployed.

What is the World Bank doing about solar power in Somalia?

The World Bank's Somalia Electricity Access Project has deployed \$3.0 million towards electrification of households and businesses through standalone solar home systems, and the Bank is using an additional \$1.0 million to facilitate analytical work for enabling electrification through solar-powered hybrid mini-grids.

How can BECO's new solar power plant help Somalia?

Because Somalia struggles with a lack of electricity and high electric costs, BECO's new solar power plant has the potential to positively impact many people's lives. When it opened, the power plant had the capacity to produce 8 MW.

Can solar power replace diesel generators in Somalia?

A surge in solar power Another source of energy gaining traction in Somalia is solar power. One of the biggest electricity companies in Mogadishu, BECO, set up a solar plant to supplement and, in the long run, potentially replace diesel generators that individuals and businesses have been using for decades, the company said.

Can BECO's solar power plant lift Somalis out of poverty?

BECO's solar power plant could have a significant impact on Somalis, lifting many out of poverty. Lack of access to electricity is widely cited as a large contributor to poverty. Without electricity, families don't have a non-polluting source of energy for cooking. Refrigerators are unusable. Children can't do their homework after dark.
