What is Liebert iCOM™?

The Liebert iCOM™ directly connects with the facility network (Ethernet) and enables communication between multiple Liebert® PEX+™ units for synchronized operation, guaranteeing increased reliability and precision cooling room control. Performance tolerance 5% For net capacities, deduct fan input power.

Can a Liebert NX be used in life support?

Failure to do so could result in personnel safety risk, equipment malfunction and invalidation of warranty. The Liebert NX has been designed for Commercial/Industrial use only, and is not recommended for use in life support applications. This is a low emission CLASS A Uninterruptible Power System (UPS) product.

What services does Emerson Network Power offer?

All solutions are supported globally by local Emerson Network Power service technicians. Liebert AC power, precision cooling and monitoring products and services from Emerson Network Power deliver Efficiency Without Compromise™ by helping customers optimize their data center infrastructure to reduce costs and deliver high availability.

What is Liebert NX?

Economical The Liebert NX family of UPS systems combines numerous technology advances and innovations to create a power system that combines high performance, compact size, reliability and cost efficiency. Liebert NX models are available with characteristics to fit the flexibility and availability needs of different

Why should you choose Emerson Network Power?

Emerson Network Power offers more ways to handle your Liebert precision cooling maintenance and emergency service requirements than any other source. Service and support specialists are located everywhere you need them to be.

How does Liebert ICOM work?

The full line of Liebert chilled water systems use Liebert iCOM microprocessor-based controls to maintain precise temperature and humidity levels, while the cooling hardware is designed and built for continuous, trouble-free operation. Available in ten cooling capacities, with either upflow or downflow configurations.

Liebert®; Safeguarding the technology that drives your business. Liebert helps you create the intelligent ecosystems that meet these needs. Our power and thermal management solutions ensure you can continuously access your vital applications, protect your IT environment, and grow and adapt with changing requirements.
