How much did BrightSource invest in the Ivanpah solar power plant?

The Ivanpah Solar Power Facility, BrightSource's 377 MW, 3,900-acre (16 km²) plant opened on February 13, 2014. The total cost of the Ivanpah project was \$2.2 billion. The largest investor in the project was NRG Energy, a power generating company based in Princeton, New Jersey, that contributed \$300 million.

Who is BrightSource Energy?

BrightSource Energy, Inc. is an Oakland, California based, corporation that designs, builds, finances, and operates utility-scale solar power plants. Greentech Media ranked BrightSource as one of the top 10 greentech startups in the world in 2008. BrightSource was formed with seed capital from VantagePoint Venture Partners.

Is Ivanpah the world's largest solar thermal plant?

The Solar Electric Generating System Earns POWER 's Highest Honor The era of Big Solar has arrived, and at the moment there are none bigger than Ivanpah. For overcoming numerous obstacles to build the world's largest solar thermal plant, the Ivanpah Solar Electric Generating System (ISEGS) is a landmark achievement.

Who owns Ivanpah power plant?

NRG Renewables, BrightSource Energy, and Bechtel Corporation (EPC) for the plant. NRG Renewables is now the majority owner and in charge of operations for the joint venture. Few power plants can be called "small," but nearly everything about Ivanpah is mammoth. The three-unit site sprawls over 3,500 acres--nearly 5 miles from end to end--near

Is bright-source energy a problem?

Just such as the burrow shown here. Courtesy: Bright-Source Energy is a problem, depends on whom you ask. It's undisputed that several dozen to several hundred birds have been killed over the past year or so, and this was enough to create

Can Ivanpah get 33% of its electricity from renewable sources?

obtain 33% of their electricity from renewable sources by 2020. Power purchase agreements (PPAs) for Ivanpah's production were signed with Pacific Gas & Electric (PG&E, for 118 MW to 126 MW from Unit 1 and 126 MW to 133 MW from Unit 3) and Southern California Edison (SCE).

The three individual power plants at Ivanpah will feature BrightSource Energy's solar thermal power tower technology to produce clean, renewable energy from the sun. When completed in 2013, the facility will nearly double the amount of solar thermal electricity produced in the U.S. Power generated from the plants will be sold under separate ...

Ivanpah is a joint effort between BrightSource Energy, NRG Energy (through its subsidiary NRG Renew, formerly NRG Solar), Google, and Bechtel. BrightSource began development in 2006, hoping to leverage its experience in developing CSP technology worldwide. NRG and Google contributed substantial funding, while Bechtel supplied engineering, procure-

On January 22, 2010, the "BrightSource Energy & Ivanpah Project Overview for the Renewable Energy Policy Group" presentation indicated on the "Project Scale - Up" slide the Solar Thermal Chevron EOR Demo Plant (29 MWth) would be completed by 4Q/2010. Project completion is running almost a year later than expected thus far.

The project is a joint effort by NRG, Google, and BrightSource Energy. Ivanpah is one of five CSP projects that received loan guarantees from the Energy Department. When these projects are completed, they will provide a combined 1.26 gigawatts of electric capacity. These loan guarantees are also helping to finance the first solar thermal ...
