TY - GEN. T1 - Energy Snapshot - British Virgin Islands. AU - NREL, null. PY - 2020. Y1 - 2020. N2 - This profile provides a snapshot of the energy landscape of the British Virgin Islands (BVI), one of three sets of the Virgin Island territories in an archipelago making up the northern portion of the Lesser Antilles.

Opportunities for Residents and Investors. In November 2018, the BVI brought into force Renewable Energy Regulations made under a 2015 amendment to the British Virgin Islands Electricity Corporation Act. The BVI is well positioned to generate several forms of renewable energy--wind, solar and hydro energy being the most obvious.

Eurowind Energy chief executive Jens Rasmussen added: "By consolidating all the turbines in Denmark's largest wind park, we maximise the value of the park. We have several other joint interests, so it is certainly possible that we will further enhance our cooperation with Wind Estate, both in Denmark and abroad." ...

While the British Virgin Islands relies on imported oil and gasoline for nearly all of its energy and transportation needs there is a wealth of untapped renewable energy resources such as solar, ...
