

Why is Burkina Faso launching a solar power plant in Komsilga?

Loading... In a significant step towards enhancing electricity supply and sustainable development, Burkina Faso signs an agreement for a 50 MWp solar power plant in Komsilga. The initiative, led by the Minister of Energy and Energie Plus, aims to fortify renewable energy contributions, fostering economic growth and improved access to electricity.

Can Burkina Faso achieve 95% electricity access?

The country aims to reach 95% electricity access, with 50% in rural areas and universal access to clean cooking solutions in urban areas, with 65% in rural areas by 2030, up from 9% in 2020. The utilisation of Burkina Faso's renewable resource potential would enable the country to reduce its heavy reliance on thermal generation and energy imports.

Is Burkina Faso suitable for solar power projects?

This suitability assessment was carried out at the request of the Government of Burkina Faso to map potential areas for utility-scale solar photovoltaic (PV) and wind projects. Currently, less than 25% of the population has access to electricity and the majority of those with access live in urban areas.

Will a 50 MWp solar power plant bolster Burkina Faso's electricity supply strategy?

In a pivotal move to bolster Burkina Faso's electricity supply strategy, the Minister of Energy, Mines, and Quarries, Simon-Pierre BOUSSIM, and Serge CONSEIGA, General Director of Energie Plus, sealed an agreement for the construction of a 50-megawatt peak (50 MWp) solar power plant in the commune of Komsilga, Burkina Faso.

How has Burkina Faso changed over the years?

Burkina Faso has made remarkable progress in recent years, with an increase in installed capacity from 324.6 megawatts (MW) in 2017 to 410 megawatts in 2019. The share of renewable energy also surged from 9.4% in 2015 to 18.36% in 2019.

How will Burkina Faso improve electricity trade with neighbouring countries?

Additionally, the results from this report are intended to inform the design and development of the country's regional projects as Burkina Faso is planning to enhance electricity trade with neighbouring countries through regional interconnectors with Benin, Niger, Nigeria and Togo.

Burkina Faso benefits from daily sunlight of 5.5 KWh/m² for 3000 to 3500 hours per year, with a uniformly distributed solar resource across the national territory, yielding an average of 1620 KWc. This growth in renewable energy has been ...

Facing the challenge of energy and food in Burkina Faso. Burkina Faso is one of the poorest countries in the world according to the classification by Human Development Index of UNDP. It has few energy resources and its agriculture is not enough efficient and diversified to lead definitively the country out of food insecurity.

L'énergie surtout celle propre à tant un levier du développement socio-économique, nous nous sommes engagés depuis 2017 à disposer des modules solaires photovoltaïques aux pays africains à travers la société Faso Energy SA, qui est une unité de production à Ouagadougou (Burkina Faso) inaugurée en Septembre 2020.

Le Burkina Faso a sa première unité industrielle de fabrication de panneaux solaires photovoltaïques, d'ailleurs Faso Energy. Selon ses responsables, elle a coûté plus de 3 milliards F CFA avec une valeur ajoutée prévisionnelle de plus de 7 milliards F CFA. Ayant une capacité de production de 30 mégawatts-crête (mwc) par an, elle ...

This project is expected to improve Burkina Faso's energy security, diversify its energy mix, increase national electrification rates, and reduce electricity costs. It aligns with ...

We raise public awareness of using non-green energy in homes and businesses. We emphasize the impact of fossil energy reflected in oil price increases, escalating business operational costs, reducing turnovers, and plummeting net profits while contributing to adverse climate change.

L'entreprise Faso Energy s'inscrit dans la fabrication de panneaux solaires photovoltaïques et entend jouer sa part dans la stratégie nationale d'industrialisation au Burkina Faso. A cet effet, elle compte inaugurer son usine, le 22 septembre 2020, dans la zone industrielle de Kossodo, Ouagadougou.

Le Burkina Faso a sa première unité industrielle de fabrication de panneaux solaires photovoltaïques, dite Faso Energy. Selon ses responsables, elle a coûté plus de 3 milliards F CFA avec une valeur ajoutée ...

In this context, most African countries have embarked on the diversification of their energy mix during the last decade. Their renewable energy share in the total primary energy supply remains low, with 1.3% represented by hydroelectricity and less than 0.1% coming from solar and wind (2013) [3]. Solar energy is gradually finding its place, especially photovoltaic ...

The aim is to increase access to clean energy by improving the financial viability of, and promoting large-scale commercial investment in, solar photovoltaic minigrids in Burkina Faso. The project will also support the government's COVID-19 recovery efforts and strengthen the resilience of vulnerable communities by supporting livelihoods and ...

The Energy Sector Policy serves as a reference document for the energy sector in Burkina Faso. This document sets the energy sector's national strategies and targets for 2014-2025 including 50% renewable generation by 2025 and opportunities for solar and biomass technologies. LAW NO. 053-2012, 2012 (Law No. 053-2012/AN) This law outlines the ...
