Does Cambodia have solar power?

However, considering the country's historical energy mix, the existing solar capacity appears positive. As of 2011, Cambodia had no solar power plants, and solar energy was not a part of the country's energy mix. Cambodia's current installed solar capacity is slightly over 400 MW, but the country is targeting 3.1 GW by 2040.

How much does solar energy cost in Cambodia?

One of the promising traits of solar energy in Cambodia is its cost. The average electricity price for solar power is around USD 0.03 per kW, significantly lower than that of coal, which is USD 7.7 per kW.

Is Cambodia a good place to invest in solar energy?

Cambodia has one of the highest solar energy potentials in the region. The country plans to significantly scale up capacity in the coming decades to strengthen the energy grid and reach its net-zero emissions goals.

Cambodia"s recent solar power tender is the first of a two-phase auction process that falls under development of a plan to build a 100-MW National Solar Park in Kampong Chhnang province. ADB"s Office of Public-Private Partnership is serving as a transaction adviser and assisting EDC to design and conduct an open and competitive bidding ...
