Will Canada join the Green-powered future & clean hydrogen missions?

Renewing our commitment to MI, Minister O'Regan announced Canada will join the new Green-Powered Future and Clean Hydrogen Missions to address major energy challenges under bold innovation objectives.

Why should Canada participate in MI?

Canada should participate in MI because our participation directly supports Canada's outcomes-oriented approach to energy innovation policy and programs to exceed our 2030 emissions reduction goal and achieve net-zero emissions by 2050. NRCan is increasingly adopting a systemic, mission-oriented approach to harness innovation capacity and build a green economy.

Why is Canada launching the Empowering People initiative?

He announced that Canada, alongside the United States and the European Commission, is launching the Empowering People Initiative to promote fair and equitable transitions in the clean energy sector, as well as advancing skills, inclusivity and workforce development.

How can Canada reach net-zero emissions?

Canada recognizes the value of demonstrating the impact of technology and innovation to achieve the deep decarbonisation required for net-zero emissions.

What missions does Canada participate in at COP27?

Canada co-leads the CDR Mission and participates in the Clean Hydrogen, Green-Powered Future, Integrated Biorefineries, and Net-Zero Industries Missions at COP27. During the conference in November 2022, Canada also announced it will be joining the Zero-Emissions Shipping Mission. Canada is privileged to be co-leading one of Mission Innovation's new Missions.

How many people work in Canada's nuclear industry?

Canada's nuclear industry employs more than 76,000 people across a wide variety of professional and skilled trades fields. That number could grow rapidly as new nuclear reactors are deployed across Canada, but not nearly as rapidly unless we build CANDU reactors.
