

Who owns statera Energy Limited?

EQT is pleased to announce that the EQT Infrastructure VI fund ("EQT Infrastructure") has agreed to acquire Statera Energy Limited ("Statera" or the "Company") from InfraRed Capital Partners. The UK energy landscape is steadily decarbonizing.

What does statera energy do?

Our assets provide critical grid balancing support for a renewables-led power system, enabling the UK's decarbonisation drive while increasing national energy security. © 2024 Staterra Energy. All Rights Reserved.

Does statera energy have debt financing?

Statera Energy Limited announced today that it has secured up to GBP 300 million (USD 376.1m/EUR 344.7m) of debt financing with nearly half of the total amount to be used to support the delivery of a 300-MW/600-MWh battery energy storage system (BESS) in the UK.

Is statera a good company?

Statera is well-positioned to benefit from and meet the increasing demand in this space. Established in 2015 and headquartered in London, Statera is a prominent player in the UK's battery storage and flexible energy generation sector, with a robust development track record.

How much power does statera have?

Set up in 2015, Statera has 1 GW of flexible generation in operation and under construction, a capacity enough to power around 750,000 homes. The company's project pipeline tops 16 GW, with 7.5 GW of flexibility assets planned to be deployed by 2030. Do you know we have a daily hydrogen newsletter? [Subscribe here for free!](#)

The partnership between EQT and Statera is an exciting step towards achieving this goal. Tom Vernon, Founder and CEO of Statera, added: It is essential that flexible generation and energy storage technologies are ...

Play your part in generation-defining projects as we transition to a decarbonised, renewables-led energy system, and a greener, cleaner future for the UK. ... Our people want Statera to have a positive and material impact on the environment and society, delivering projects that push the boundaries. Best-in-class approach.

Company status

UK-based Statera Energy Limited has secured planning approval from the East Devon District Council for its project to deploy a 290-MW battery energy storage system (BESS) directly connected to the local Exeter substation.

The firm agreed a deal with InfraRed Capital Partners to acquire Statera Energy earlier this month (6 November). Statera, a UK-based battery energy storage and flexible energy generation developer and operator, ...

Swedish investment firm EQT AB has sealed a deal to acquire Statera Energy Limited, a London-based developer of flexible generation, battery storage, pumped hydro and green hydrogen projects, from infrastructure ...

About Statera Statera Energy is a UK-based energy company that develops, owns, and operates flexible generation, battery storage, pumped hydro and green hydrogen projects. These assets will help the UK build more ...

A range of flexible technologies are required to help ensure a consistent and stable energy supply while the UK power system looks to decarbonise by 2030. ... All of Statera's assets are designed to deliver this reserve service to National Grid. 4. Balancing Mechanism. The Balancing Mechanism (BM) is the primary market used by National Grid ...

Statera Energy has submitted plans for the UK's first utility scale green H₂ project to be built in Aberdeenshire. Kintore Hydrogen will help balance a renewables-led power system by using surplus renewable energy to produce green H₂. Once constructed, Kintore Hydrogen will be the largest project of its kind in Europe.

EQT is pleased to announce that the EQT Infrastructure VI fund ("EQT Infrastructure") has agreed to acquire Statera Energy Limited ("Statera" or the "Company") from InfraRed Capital Partners.

The partnership between EQT and Statera is an exciting step towards achieving this goal. Tom Vernon, Founder and CEO of Statera, added: It is essential that flexible generation and energy storage technologies are deployed at scale to enable the vast amounts of renewables required to decarbonize power systems.

The hydrogen produced can then be stored before being used to run flexible generation at times of low renewable energy output. Hydrogen production. Through the process of electrolysis, excess renewable energy is used to produce green hydrogen. This hydrogen can be used in a variety of applications as a zero-carbon fuel, such as displacing ...
