Solar panels generate electricity from sunlight, reducing your reliance on grid electricity and leading to significant savings on your utility bills. Additional peace of mind is also gained by not having to worry about rising oil and gas prices.

Also referred to as feed-in-tariff programs, this process involves installing solar panels on your property and selling that power back to the grid. The power generated by the solar panels connects directly into the electric utility feed. In Cayman Islands, this process is called the CORE program. Inverters:
