

Chad energy innovative solutions

What is the Chad energy access scale up project (PAAET)?

The Chad Energy Access Scale Up Project (PAAET) aims to increase access to electricity and clean cooking solutions via expansion of the main power grid and mini-grids, standalone solar systems, deployment of improved stoves, and natural resource management.

Why is Chad a good place to invest in solar power?

Chad's location in the Sahel, which features brilliant sunshine especially during the dry season, and lack of alternate fuel sources such as coal make solar power an attractive export and investment sector. Chad currently generates electricity by consuming oil.

How does Chad generate electricity?

Chad currently generates electricity by consuming oil. With the declining cost of new solar generation plants, the Government of Chad and development partners have prioritized solar power throughout the country. Machinery and parts for electricity transmission and distribution are also in demand. Opportunities

How does the bank support access to energy in Chad?

"The Bank's support strategy for access to energy in Chad is based on a two-pronged approach: off-grid electrification led by the private sector to rapidly boost access and national grid-based electrification by SNE, which is strategically important," said Clara de Sousa, Country Director for Burkina Faso, Chad, Mali, and Niger.

Can Chad develop a national power strategy?

There are also opportunities to collaborate with the Government of Chad on developing a national power strategy. In March 2019, the Overseas Private Investment Corporation (OPIC), a U.S. Government development finance institution, committed \$10 million to support the introduction of off-grid solar kits and appliances in Chad.
