Scuba diving at Cocos Keeling islands is nothing short of spectacular. Fabulous visibility, pristine coral reefs, abundant marine life and all the trappings of a tropical paradise without the flashy resorts. Yes, it is isolated and it takes some effort to get there, but this is more than offset by the quality of the diving, the friendly locals

...

The new proposals, unveiled yesterday by the Department for Business, Energy and Industrial Strategy (BEIS) follow a previous consultation in January on planning policy for storage sites. As it stands, projects over 50MW in England and 350MW in Wales must secure approval via the Nationally Significant Infrastructure Project (NSIP) process.

Planning law in the UK allowing energy storage projects over 50MW has officially changed, allowing much bigger projects to come online without going through the national planning process. In July, ministers passed secondary legislation that will allow battery storage to bypass the Nationally Significant Infrastructure Project (NSIP) process in ...

For seasonal energy balancing - very long duration storage technologies used to help with energy balancing typically in the winter months where there are less renewables on the system - only one technologies was considered, hydrogen, which came in at a central scenario CapEx of £779.80/MWh in 2050.

The Cocos (Keeling) Islands (Cocos Islands Malay: Pulu Kokos [Keeling]), officially the Territory of Cocos (Keeling) Islands (/ ˈ k oʊ k ɪ s /; [5] [6] Cocos Islands Malay: Pulu Kokos [Keeling]), are an Australian external territory in the ...
