2024 Key Takeaways - Global Chemicals & Energy While the chemicals industry was beset by continued overcapacity and weak demand in 2024, the energy market found itself at a transformative juncture. Explore

our key takeaways to find out more.

At the end of last year, the French power market witnessed a rapid drop in the Q1 23 price as the delivery period approached, certainly driven by the reduction of the natural gas price, but also by the prompt disappearance of a significant risk premium, which had been in turn mainly boosted by uncertainties over nuclear generation and fear of potential cold spells.

In the first half of 2024, the global base oils market experienced varied supply and demand challenges across different oil groups. China's overcapacity and slow economic recovery further influenced production and trade dynamics, while new capacities in India and shifting export strategies in Asia highlighted ongoing market adjustments.
