Uganda: Captive Power Model Business Case: Solar Photovoltaic (PV) for Commercial and Industrial Facilities INTRODUCTION This Model Business Case analyses the financial feasibility of medium-size solar photovoltaic (PV) captive power system investments at hypothetical yet realistic sites in Uganda. Captive power -- or the self-generation of ...

The amount of power your solar energy system can generate is dependent on sunlight. As a result, your solar panels will produce slightly less energy when the weather is cloudy, and no energy at night. However, because of high electricity costs and financial incentives, solar is a smart decision even if you live in a cloudy city.

The construction and operation of commercial-scale solar PV systems relies on significant investment, with many things determining the success of the project and the performance of the PV array. As a large supplier of complete solar PV systems in Africa and Europe, we offer a full range of products for commercial-scale PV systems up to 1MW.
