What makes the Geneverse (formerly generark) solar generator a good choice?

The Geneverse (formerly Generark) Solar Generator offers several features that make it a good choice for households. It has been reimaged with a vertical design to take up minimal floor space in your home. Here are the top four features:

Which solar generator should I buy?

With its durable enclosure and ergonomic design, the GB2000 is our top choice if you're looking to take your solar generator outdoors. The 2,106-watt lithium-ion battery packs plenty of power in a relatively compact package, and the "parallel ports" make it possible to connect two units together, effectively doubling the power output.

Are solar-powered generators a good option for storm preparation?

Solar-powered generators have only been around for a few years, but they've quickly become a key part of many homeowners' storm preparation plans. Also known as portable power stations, they can keep appliances like refrigerators and furnaces running during emergency outages -- but they're also handy for campsites, construction sites and RVs.

Should I use a solar generator or a gas generator?

For lower power needs under 3,000 watts, solar generators are ideal, while gas generators work better for larger demands, especially 10,000 watts or more. If automatic backup power is essential, a standby gas generator is reliable and easier to install, although some solar options offer this with more complex setups.
