Who owns electricity in Congo?

Less than 10% of Congo's roughly 90 million people have reliable access to electricity. The consortium is led by Gridworks, which is owned and financed by the British development finance institution CDC Group, and includes French utility company Eranove and Spanish power developer AEE Power.

Could solar power be the future of energy in Congo?

Congo is one of the top five oil producers in Sub-Saharan Africa. But despite its rich energy resources, the electrification rate is low, especially in rural areas, mainly because of a lack of electricity infrastructure. But solar power could be the future as it is also said to be cheaper for households.

How will Nuru power Congo?

With the money, Nuru will increase its urban microgrids in Congo to four, from one, and be able to produce 13 times as much electricity. The company eventually hopes to provide millions of Congolese with cheaper and more reliable electricity than what is produced by the diesel generators that most now use.

Why is the electrification rate so low in Congo?

According to the World Bank, nearly half of the Congolese population does not have access to electricity. Congo is one of the top five oil producers in Sub-Saharan Africa. But despite its rich energy resources, the electrification rate is low, especially in rural areas, mainly because of a lack of electricity infrastructure.

How many people in Congo can't afford electricity?

More than 70 million of Congo's 100 million people cannot afford or access electricity. Its population is currently growing faster than new electricity customers are being brought online. Ezekia Rubona owns a small shop in Goma that previously relied on diesel generators for electricity. Moses Sawasawa for The New York Times
