

What is energy in Croatia?

Energy in Croatia describes energy and electricity production, consumption and import in Croatia. As of 2023, Croatia imported about 54.54% of the total energy consumed annually: 78.34% of its oil demand, 74.48% of its gas and 100% of its coal needs.

Can energy projects make Croatia greener?

Several energy projects aim to make Croatia greener, ensure a secure energy supply, and improve lives in Zagreb. Just eight kilometres from the Ka?tel Benkovi?, a medieval castle, the village of Korlat produces one of the finest red wines in both Croatia and Europe.

What is Croatia's solar energy potential?

“Croatia's solar energy potential estimated at 6.8 GW”, Balkan Green Energy News. Retrieved 18 March 2022. ^Spasi?, Vladimir (10 November 2021). “Croatia to add 1.5 GW of renewables by 2025”, Balkan Green Energy News. Retrieved 18 March 2022.

How can Croatia achieve a low-carbon economy?

Croatia wants to cut its CO₂ emissions by 45% by 2030 and to abandon coal by 2033. But the transition to a low-carbon economy won't be easy, requiring major investments in new energy infrastructure and increased renewable energy resources. To achieve its goal, Croatia set up a 2030 National Energy and Climate Plan.

What percentage of Croatia's energy mix is renewable?

Renewable energies account for approximately 31.33% of Croatia's energy mix. Hrvatska elektroprivreda (HEP) is the national energy company charged with production, transmission and distribution of electricity.

Could geothermal energy be a source of sustainable power in Croatia?

SARAJEVO, June 6 (Reuters) - Croatia is eyeing geothermal energy as a major source of sustainable power and has just closed an auction for six productive exploration sites to interested bidders, a top energy official said on Tuesday.
