

How can Croatia benefit from solar energy?

However, to harness this potential effectively, Croatia will need to adopt more ambitious solar energy targets, ensure clear renewable energy investment direction in the power sector, and develop its modern electricity grid. The clean energy transition and development of the solar power sector can contribute to GDP growth and new jobs creation.

Is solar irradiation a viable energy source in Croatia?

The abundance of solar irradiation in Croatia shall enable photovoltaic energy to become an increasingly cost-competitive power generation source and attract new investments. Croatian solar resource potential Energy Institute Hrvoje Pozar initiated several solar radiation measurements projects in Croatia.

How much solar power does Croatia have?

By the end of 2014, the country had approximately 33 MW solar capacity. However, solar photovoltaic market growth in Croatia between 2015 and 2019 was moderate, with only 20.4 MW newly installed capacity in this period from eligible producers.
