

How much electricity does Croatia produce in 2022?

The total production of electricity in the Republic of Croatia in 2022 was 14,220.5 GWh, whereby 63.7 percent (9,064.9 GWh) was produced from renewable energy sources, including large hydropower plants.

How does Croatia get its electricity?

Croatia satisfies its electricity needs largely from hydro and thermal power plants, and partly from the Krško nuclear power plant, which is co-owned by Croatian and Slovenian state-owned power companies. Renewable energies account for approximately 31.33% of Croatia's energy mix.

What is Croatia's solar energy potential?

"Croatia's solar energy potential estimated at 6.8 GW", Balkan Green Energy News. Retrieved 18 March 2022. ^Spasi?, Vladimir (10 November 2021). "Croatia to add 1.5 GW of renewables by 2025", Balkan Green Energy News. Retrieved 18 March 2022.

What percentage of Croatia's energy mix is renewable?

Renewable energies account for approximately 31.33% of Croatia's energy mix. Hrvatska elektroprivreda (HEP) is the national energy company charged with production, transmission and distribution of electricity.

Is Croatia a Good Energy Gateway?

"Croatia has a good chance to be the energy gateway for a number of neighbouring central European countries in the current energy geopolitical situation and difficulties of energy imports from Russia," said Igor Dekani?, a professor at the geology and mining faculty of Zagreb university.

Should Croatia invest in solar & wind power?

With its long Adriatic coastline, Croatia is eyeing rapid development of solar and wind power, says Dražen Jakšić, director of Zagreb's Hrvoje Požar Energy Institute. There is strong investor interest in backing new projects that would greatly increase Croatia's current clean power generating capacity of just over 1GW, he added.

3 ???#0183; Future energy prospects and sustainability. Looking to the future, Croatia is positioning itself to further diversify its energy portfolio. The emphasis is on increasing the share of renewables in its energy mix, aligning with global sustainability goals. The government is fostering innovation in energy technology, aiming to modernize the sector.
