The town of Bchaale in North Lebanon is home to 2400 residents and is reputed for its scenic hiking trails that attract eco-tourists. However, the town lacks adequate infrastructure that properly mitigates its wastewater, which poses environmental and public health risks and negatively impacts tourism. In response, USAID's Community Support Program (CSP) is constructing a

To ensure the sustainability of this USAID assistance, CSP is collaborating with Lebanese service provider Quick Solutions to provide the municipality with an automated municipal financial system. In parallel, CSP is training municipal council members on the use of the system as well as on accountability and public spending transparency.

CSP's COMMUNITY ACCOUNTABILITY REPORTING SYSTEM If you are a community member or local partner benefiting from a CSP project, and have a concern or complaint pertaining to a program-related activity, please contact the CSP CARES hotline by phone or WhatsApp 81-747300 or by e-mail LBN-CSP-Hotline@lebanoncsp

On October 31 and November 2, 2022, CSP trained seven participants from Majdel Aanjar municipality, Electricity of Lebanon (EDL), and BWE on the operation and maintenance of the PV solar panels, the chlorination system, and other water pump accessories.

In response, USAID's Community Support Program (CSP) completed the installation of solar photovoltaic modules to upgrade the town's water pumping system, which was successfully tested and has been operating for 8 to 9 hours per day since August 23, 2022. By the first week of September, CSP will finalize the civil and rehabilitation works to ...

policy setting, System Restore is turned off, and the System Restore Wizard can't be accessed.

In response, USAID's Community Support Program (CSP) revolutionized the town's backup electricity infrastructure by installing solar photovoltaic modules. By the end of January 2023, CSP had successfully tested and operated the system and is currently finalizing minor works before handing the system over to the municipality.

On December 13, 2022, CSP trained four participants from the Hasbaiya Municipality and the South Lebanon Water Establishment-SLWE, on the operation and maintenance, safety measures, and the chlorination environmental compliance of the system, to ensure the sustainability of the provided equipment.
