

# Cubic modulsystem Comoros

What is a cubic modular system?

The versatility of the modular system makes it easy and quick to assemble and install electrical panels as well as to extend and/or modify existing panels - including older enclosures. The CUBIC modular system provides numerous possibilities for construction of tested panels.

Why should you choose cubic modular?

Whenever the need for a safe and efficient power distribution is needed, the CUBIC Modular system is the answer. The modular thinking behind our signature enclosure system makes it possible to build every type of switchboard solution in the low-power segment, based on several standard parts, without compromising on quality.

What is a modular busbar system?

The modular system is supplied in parts. Using a relatively few standard parts, it is possible to build enclosures in bespoke sizes and models. CUBIC's type-tested busbar systems consist of standard components and cover a range up to 8750 Amps.

Who is cubic?

The Power of Modular Thinking. |CUBIC was founded in 1973 based on a unique idea for a modular system for the construction of electrical panels. This idea has since the early start developed CUBIC into a global and recognized partner within electromechanics and with a product range that comprises any type of enclosure.

How big is a cubic module?

The main module of the CUBIC modular system is 192 mm, which is remarkable for being divisible by 12 figures without decimals. During the construction of a panel, logical main and sub modules are used so that the fitter need not take millimetres into consideration. All fitting is done by means of only very few tools.

What is modular system?

The Modular System is extensively tested by leading and independent test laboratories. This ensures a high validity of our assertions and ensures a documentation and independency, on which all stakeholders can rely. The Modular System is verifiable according to the IEC/ EN 61439 standard.

panels. This idea has since the early start developed CUBIC into a global and recognized partner within electromechanics and with a product range that comprises any type ...

CUBIC's standard programme of stainless enclosure products covers various application possibilities. In addition, it allows for quick delivery to the customers, as all enclosures within the standard programme are stock products, which can meet the demands of the end-user with none or very few adjustments. ... CUBIC-Modulsystem A/S ...

CUBIC has since the start in 1973 developed into a global Partner within enclosures for low voltage switchboards. CUBIC was established based on a unique idea for a modular system for the construction of electrical panels. The range of products has since been developed to comprise almost any type of enclosure for use within the electromechanical industry.

CUBIC pays great attention to both personal safety and operational dependability, and we therefore currently carry out tests that are demanded by the market, such as earthquake tests, shock tests and arcing tests. ... CUBIC-Modulsystem A/S Skjoldborgsgade 21 DK-9700 Brønderslev Tel: +45 9882 2400 E-mail: info@cubic . Join our newsletter.

The products from CUBIC are tested and certified current spot tests from CUBIC's production of the modular system. In addition, the quality system with CUBIC-Modulsystem A/S has been certified according to ISO 9001. The quality system is currently checked by the Danish Standards Association. Your Guarantee

Det var en original idé om et modulsystem til opbygning af eltavler, der i 1973 fik til, at Niels Albertsen og Jørgen Iversen grundlagde CUBIC. Virksomheden har i dag datterselskaber i ni ...

Med dette i tankerne blev CUBIC grundlagt i 1973 på baggrund af en unik idé om et modulsystem til konstruktion af eltavler. Denne idé har siden den tidlige start udviklet CUBIC til en global og anerkendt partner inden for elektromekanik og med et produktsortiment, der omfatter alle typer af kapslinger. ... CUBIC-Modulsystem A/S ...
