

Curaçao pure energy solutions

How will a battery energy storage system benefit Curaçao?

The implementation of a Battery Energy Storage System will allow Curaçao to collect energy from renewable sources such as wind and solar energy and store it using advanced battery storage technologies. This stored energy can be released to mitigate the intermittency of wind power and ensure grid stability.

What is Curaçao's energy policy?

In 2009, Curaçao developed an energy policy document, which sets out general guidance and governing principles for further study of energy issues.⁴ It suggests the goal of reducing energy consumption by 40% by 2020 and encourages the investigation of combining wind power with storage to provide 100% of the island's energy needs.

How much does energy cost in Curaçao?

Energy Snapshot Curaçao This profile provides a snapshot of the energy landscape of Curaçao, an autonomous member of the Kingdom of the Netherlands located off the coast of Venezuela. Curaçao's utility rates are approximately \$0.26 per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33/kWh.

Does Curaçao need electricity?

Like many island nations, Curaçao is highly dependent on imported fossil fuels (more than 95% of the island's electricity is generated using petroleum-based fuels), leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

Why does Curaçao face energy security issues?

Curaçao faces energy security issues not only due to its reliance on imported fuels but also because of the age of its generation infrastructure. Thirty megawatts (MW) of Aqueduct's generation portfolio is beyond its expected service life and the surplus power from the RdK refinery is subject to frequent outages.

Why does Curaçao use wind energy?

Curaçao's long history with wind energy has provided it with valuable experience in integrating variable energy resources into the electrical system while also demonstrating the value of avoiding petroleum-based electricity generation.

PurePoint Energy will work in consultation with you to best determine the right solution, circuits to power, and battery size. Contact our energy storage team at any time to learn more about the different energy storage options available to you. Just like our solar consultations, our battery quotes are 100% free.

Thank you for your interest in Pure Gold! If you have any questions or require further information about our services, we would be delighted to assist you. Please feel free to reach out to us using the information below or contact form on our website. Pure Gold Energy Drink PO BOX 2490, 7302 ER, Apeldoorn, The Netherlands.
