

How long does a sunset last in Kenya?

While a sunset in the northern USA or central Europe can take almost an hour, in Kenya, it lasts only an average of 24 minutes. Kenya is so close to the equator that there is no noticeable difference even between June and December. The capital Nairobi lies almost exactly on the equator and therefore also between the tropics.

What is solar dryer in Kenya?

Solar dryer in Kenya is used to dry fruits, mushrooms, meats, Omena, and meat to preserve them to increase longevity for future ... Greenhouse construction in Kenya includes choosing the right company and materials depending on the cost and location of the area. In some lo...

When does the sun come out in Kenya?

At the solstice on June 21, it is perpendicular above the northern tropic, and on December 21 above the southern tropic. If a country like Kenya lies between these tropics, the sun crosses its latitude twice a year and then shines vertically from above. For Nairobi, this is on March 17th and September 26th.

How many hours a day does the sun shine in Nairobi?

For the Nairobi Area region, we have shown the approximate sunshine duration in the graph here. In June, the sun shines for around 5:18 hours a day. In contrast, the day is 12:05 hours long. This means that the visual obstruction is around 6:47 hours per day. In December, on the other hand, it is 3:50 of 12:14 hours.

What is the difference between sunrise and sunset in Kenya?

Sunrise and sunset in Kenya do not differ significantly throughout the year. The reason for this is the proximity to the equator. Thus, the sun swings north in the middle of the year and south at the turn of the year, without moving too far away. In countries like Canada or Norway, however, the difference is much more extreme.

What time is the winter solstice in Nairobi 2023?

Dates are based on the Gregorian calendar. The June solstice (winter solstice) in Nairobi is at 5:57 pmon Wednesday, June 21, 2023. In terms of daylight, this day is 9 minutes shorter than the December solstice. Why is the earliest sunset not on the winter solstice?
