Interactive World Map: Click anywhere to analyze daylight patterns; Color-Coded Locations: Each location is uniquely marked for easy comparison

The amount of power your solar energy system can generate is dependent on sunlight. As a result, your solar panels will produce slightly less energy when the weather is cloudy, and no energy at night. However, because of high electricity costs and financial incentives, solar is a smart decision even if you live in a cloudy city.

Daylight saving time is not observed in Aruba during 2024. For reference, on June 20, the longest day of the year, ... The average daily incident shortwave solar energy in Aruba is decreasing during the spring, falling by 1.2 kWh, from 6.7 kWh to 5.5 kWh, over the course of the season.

Daylight saving time is not observed in Aruba during 2024. For reference, on June 20, the longest day of the year, the Sun rises at 6:15 AM and sets 12 hours, ... This section discusses the total daily incident shortwave solar energy reaching the surface of the ground over a wide area, taking full account of seasonal variations in the length of ...
