

Drax power ltd Canada

Who owns Drax Power Station?

In 1990, the electricity industry of England and Wales was privatised under the Electricity Act 1989. Three generating companies and 12 regional electricity companies were created. As a result of privatisation, Drax Power Station came under the ownership of National Power, one of the newly formed generating companies.

What happened to Drax Power Station?

One significant change was the emergence of vertically integrated companies, combining generation, distribution and supply interests. In certain cases, it became necessary for generation assets to be divested, and so in 1999 Drax Power Station was acquired by the US-based AES Corporation for £1.87 billion (US\$3 billion).

How will Drax enhance its security of supply?

Drax will enhance its security of supply through an enlarged and diversified Supply Chain.

Does Drax still have licences?

But Panorama checked and the authorities in British Columbia confirmed that Drax still holds the licences. Drax said it did not use the logs from the two sites Panorama identified. It said they were sent to timber mills - to make wood products - and that Drax only used the leftover sawdust for its pellets.

Why did Drax pay a £25m penalty?

A lengthy investigation by Ofgem into its reporting concluded recently after the UK regulator cleared it of a deliberate breach, and Drax agreed to pay a penalty of £25mn into a voluntary scheme for failing to record adequate data about the wood it imported to burn from April 2021 to March 2022.
