

E solar manufacturers New Zealand

How do solar panels work in New Zealand?

Most homes in New Zealand are connected to the national electricity grid. By adding PV (photovoltaic) solar panels to your home, you can generate direct current (DC) energy from the sun. This energy is then converted from DC electricity into AC (alternating current) electricity suitable for ordinary household use, by an inverter.

Are solar panels grid connected in New Zealand?

Most homes in New Zealand are already connected to the national electricity grid, so most of the systems we install are grid connected. By adding PV (photovoltaic) solar panels to your home, you can generate direct current (DC) energy from the sun.

Who are solar technology experts?

We're not newbies, we are solar technology experts who have been installing solar systems for more than 20 years. Our technicians have installed over 3,000 solar power, solar hot water, wind, mini-hydro systems throughout New Zealand and Australia. This experience counts, and we have become a trusted name in this industry.

Who makes solar inverters & energy storage solutions?

Leading Manufacturer of Solar Inverters & Energy Storage Solutions GoodWe specialise in manufacturing solar and PV inverters as well as other electronic components.

Who are the leading manufacturers of solar power?

We've partnered with industry leading manufacturers such as Fronius, REC, Victron, Tesla Powerwall, Phono Solar, BYD, Freedom Won, Shoto, Hopergy, S-5! and Tigo to deliver a wide range of solutions to our clients and to meet the needs of domestic, commercial, industrial, off-grid and utility scale solar power solutions.
